FAYYAZ ALI

Backend Developer | Laravel & PHP Specialist

+92 321 6886133 | iam.fayyazali@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Backend Developer with over 2 years of hands-on experience building secure, scalable web applications in PHP and Laravel. Strong grounding in object-oriented programming, MVC and Action-Repository-Service architectures, RESTful API design, and MySQL query optimization. Practical experience implementing authentication/authorization and guarding against common web vulnerabilities (SQL injection, input validation, access control) in production applications. Comfortable working across the full backend lifecycle — from database schema design to API delivery — with working frontend exposure in React.js for full-stack collaboration. Plans and tracks work in Jira within Agile sprints, and uses Claude Code for AI-assisted development, reviewing and testing every AI-generated change.

CORE TECHNICAL SKILLS

Languages & Frameworks: PHP 8+, Laravel 12, JavaScript (ES6+), React.js, HTML5, CSS3

Backend Architecture: MVC, Action-Repository-Service (ARS), RESTful API design, Form Requests, API Resources, DTOs

Databases: MySQL (schema design & query optimization), Eloquent ORM, Firebase (Firestore, Realtime DB)

Security & Auth: Authentication/authorization implementation, input validation, SQL injection prevention, secure coding practices

Server & Environment: Working knowledge of Apache, Nginx, and php-fpm configuration for Laravel deployment; Laragon, XAMPP

Project Management: Jira (Agile/Scrum sprints, issue and bug tracking, backlog management), Agile delivery workflows

AI-Assisted Development: Claude Code (agentic coding for feature implementation, refactoring, debugging, code review and documentation) with human review and testing of all output

Tools: Git, GitHub, Postman/API testing, OOP, DBMS fundamentals

PROFESSIONAL EXPERIENCE

Junior Laravel Developer | Dev Dimensions

Dec 2025 – Present

- Build and maintain scalable Laravel applications using the Action-Repository-Service pattern, keeping business logic cleanly separated from data access for long-term maintainability.
- Design RESTful APIs using Form Requests, API Resources, and DTOs to enforce structured validation and consistent data contracts between frontend and backend.
- Optimize Eloquent ORM queries, relationships, and repository abstractions, improving performance across large-scale application modules.
- Strengthen application security and reliability through input validation, structured testing, and peer code review, following clean, well-documented coding standards.

React & Laravel Developer | Algo Soft Tech

May 2025 – Nov 2025

- Developed and maintained dynamic, high-performance web applications combining Laravel backends with React.js frontends.
- Designed and implemented RESTful APIs and backend business logic supporting seamless frontend integration for two live e-commerce platforms (Max Auto Care, Saraye).
- Integrated MySQL databases via Laravel's Eloquent ORM, optimizing relationships and queries for efficient data handling.
- Applied authentication and authorization controls and validated inputs to guard against common web vulnerabilities during feature development.
- Architected scalable, maintainable MVC-based applications with reusable, documented code, and conducted testing/debugging for production reliability.

Backend Developer Intern | Innvobyte

Feb 2025 – Apr 2025

- Built backend logic using Laravel controllers, routes, and Eloquent ORM for efficient data handling.
- Developed responsive, dynamic interfaces with Laravel Blade, HTML5, CSS3, and JavaScript (ES6+), wired to backend APIs.

Web Developer | Zaions

Apr 2024 – Dec 2024

- Developed dynamic, data-driven web applications using PHP and MySQL, focused on responsive user experience.
- Built reusable PHP modules and backend logic to improve performance and scalability.
- Integrated MySQL databases with optimized queries and RESTful APIs for faster load times and seamless data flow.

Web Developer Intern | Zaions *Feb 2024 – Mar 2024*

- Developed user interfaces with modern JavaScript frameworks, HTML5, and CSS3, and built interactive prototypes for client presentations.

KEY PROJECTS

Moneta — Utility Billing Platform *Current*

- Architected and developed a high-scalability utility billing system for a US-based client using **Laravel 12** with an **Action-Repository-Service** architecture.
- Engineered core enterprise modules, including multi-tenant management, ERP integration, inventory tracking, and complex bill calculation engines.
- Implemented automated rate calculation algorithms for municipal utility services (electricity, water, gas) to enable precise invoice generation for public sector/government-level operations.

iPhone-Style Portfolio — AI-Assisted Build *2026*

- Interactive iOS-themed portfolio (React 19, Vite, Tailwind CSS 4) built with **Claude Code** as an AI pair programmer: component architecture, reusable hooks, Liquid Glass UI, and a Siri assistant with a pluggable AI-API adapter and voice input.

Admin Portal — Max Auto Care *2025*

- MVC-based Laravel application managing orders, products, and core business data operations.

Max Auto Care & Saraye — Full-Stack E-commerce *2025*

- Full-stack e-commerce platforms (React, Tailwind, Laravel, MySQL) for automotive parts and clothing retail, built during Algo Soft Tech tenure.

Links: maxautocare.com.pk | Saraye Demo

Skill Sharing App (Final Year Project) *2024–2025*

- Full-stack skill-sharing platform with admin control, gig/profile management, live chat, an AI chatbot (Gemini API), and Firebase Authentication.

Links: skill-sharing-app.vercel.app

Weather Forecast App *2025*

- Real-time weather forecast web app built with React and the OpenWeatherMap API.

EDUCATION

Bachelor of Science, Software Engineering *2021 – 2025*

Minhaj University Lahore — CGPA: 3.67

CERTIFICATIONS & COURSES

- The Complete JavaScript Course 2025: From Zero to Expert! — Udemy
- Advanced CSS and Sass: Flexbox, Grid, Animations and More! — Udemy
- Tailwind CSS From Scratch — Udemy
- PHP for Beginners: Become a PHP Master (CMS Project) — Udemy
- Legacy JavaScript Algorithm & Data Structures — freeCodeCamp (Certificate)
- Laravel MVC Architecture — Code-Step-by-Step (Self-Learning)
